Monitored and performed tier 1 troubleshooting on multiple systems using a variety of tools (Cisco, Opnet, SCOM, Environment, StructureWare, BMC Event and Impact Management tool)
Performed Team Advocacy. Encouraged Tier 2 - 3 teams to transition some of their task to our team, so they can focus on lifecycle management. Created and presented monthly metrics to gauge our team and department's performance.

Regence Blue Shield *(July 1997 - March 2000)*
Printer Operator and Tape Librarian.
Ran a regular operational check to make sure that printers are functioning properly.
Managed printer queue using TSO to ensure that materials are printed in a timely manner.

RELEVANT EXPERIENCE\ PROJECTS

Medication Dispensary (Renton Technical College)   June 2012/Feb 2013
Designed and developed a user-friendly website that allows a customer to select any preferred product, register and create a login using disconnected database architecture for information storage. Used prepared statements, input validators and stored procedure for protection against SQL injections. Constructed various pieces of the solution using HTML, JavaScript and Cascade Styling Sheets.

Incident Management Application (Renton Technical College)   August 2013
Designed an online application that tracks ongoing incidents \issues using Python and Django web framework which enables online users to store and retrieve data from a MySQL database.

Charity Website (Northwest Mission of Hope - Current Project)   March 2014
Designed a website that provides information about the organization, allows users to login and register and to be able to scroll and display archived photos. Administrator user is also able to store pictures to the database, and change properties within the website without modifying the code.

EDUCATION

Associate of Applied Science in Computer Science/ Applications Developer Certificate of Completion.

Renton Technical College: GPA: 3.8   August 2011 – 2013
