HTML, CSS, JavaScript, Angular JS, Nodejs, Express, Psql, Knex, Git, GitHub

---

## PROJECTS

### **EZcrew** | [ez-crew.herokuapp.com](https://ez-crew.herokuapp.com)

- A team attendance and stats management system for rowing coaches; built using AngularJs, Nodejs, and Express, HTML and CSS/Bootstrap

### **Job Tracker** | [github.com/pupxx/Job-Tracker](https://github.com/pupxx/Job-Tracker)

- An app built to assist with keeping track of all the companies that have been applied to; built using AngularJs, Nodejs, Express, HTML and CSS/Bootstrap

### **Regatta Search** | [github.com/pupxx/Regatta-Weather-Search](https://github.com/pupxx/Regatta-Weather-Search)

- A site that rowers can use to check the weather of their upcoming rowing event; built using HTML, CSS, and jQuery

### **Polya Project**

- A group project developing an app where users could solve puzzles using the polya technique. My contribution was mainly to the back-end of the project using, Express, Node js, and Psql.
- 

## EXPERIENCE

**Bodily Injury / Litigation Auto Claims Representative** | USAA, Travelers, Athens, Confie | Sacramento, CA | 1999 - 2017

- Created a workflow that was adopted company-wide and enabled me to work so efficiently that I could allocate 10% of my time to helping coworkers and assisting on manager projects
  - Saved the company an average of \$2 million annually by monitoring maintenance data, which allowed for the decrease of average rental car days to go from 14.3 to 11.85
  - Maintained an overall file audit quality of 94.7%, a close ratio of 85%, and a score of 90% customer satisfaction
  - Managed a team of 4
-
