PROJECTS

SMASH! the Patriarchy • smashthepatriarchy.surge.sh

- Mobile friendly “game” built using HTML, CSS, JavaScript, Bootstrap & jQuery.
- Goal: Boost voices of the #MeToo movement & raise money for charity.

MemoryHole • [memoryhole.github](https://memoryhole.github.io)

- Web app built with React, Semantic UI, CSS, JavaScript, Express & PostgreSQL.
- Goal: Provide an all-in-one daily gratitude, goals, memories & journal app that structures your mornings & evenings in such a way that you set yourself up to have the most happy, productive, and intentional day possible.

Commit-m • commit-m.surge.sh (group project)

- Web app built with React, Semantic UI, CSS, JS, Express & PostgreSQL.
 - Goal: Create a Twitter like site for Git commit messages that encourages message quality, creativity & frequency by adding a social aspect & leader board to your commit messages.
-
