- Agile Project Management
- Stakeholder and Risk Management
- Data Analytics
- Business Intelligence
- Team-building
- Mentorship

WORK EXPERIENCE

Deloitte Consulting

Mumbai, India

Consultant – Systems Integration / Program Management, Functional and Testing services

Apr 2015 – May 2017

- Spearheaded agile teams of 3-5 people to design and implement 4 software modules on a \$20 million project, while saving roughly 30% of delivery costs through streamlined sprint estimation, planning, and execution
- Collaborated with business stakeholders to define high-level system requirements, transformed these requirements into actionable functional and technical specifications, and worked with the software implementation teams to prioritize and develop these features
- Led the creation of end-to-end functional test scenarios for 7 software modules and coordinated their execution across the software development lifecycle (SDLC), ensuring that developed systems aligned with the clients' business needs
- Collaborated seamlessly with cross-functional, multi-site teams to manage work allocation, task prioritization, issue escalation, and stakeholder communication during multiple SDLC phases for 2 projects
- Envisioned and built business intelligence dashboards for management teams across 4 projects to automate reporting capabilities and provide comprehensive views of project metrics, reducing the report generation efforts by 70%
- Delivered successful sales demos to existing clients for implementation of new modules which generated nearly \$100,000 revenue for the firm

Business Technology Analyst – Systems Integration / Systems Development

Jun 2012 – Mar 2015

- Led teams of 2-3 people to develop web-based enterprise applications, including user interfaces, business logic, web services, batch processes, and data access components, using the .NET framework for 2 multi-million-dollar projects
- Trained over 20 professionals across the U.S. and India as the business and technical subject matter expert (SME) for 2 major functional modules in the U.S. pension administration industry at Deloitte
- Designed and developed business intelligence dashboards using IBM Cognos and SSIS packages, which enabled the client's executive team to measure, analyze, and improve operational performance and organizational competitiveness
- Boosted data sharing and accessibility for clients' employees by leveraging subject matter expertise to design and develop transactional reports that summarized real-time data using Microsoft SQL Server Reporting Services
- Analyzed functional requirements and estimated technical implementation costs as part of the request for proposal response teams for 3 multi-million-dollar projects
