WEB DEVELOPMENT PROJECTS

Gamified Goal Tracker | gamified-goaltracker.herokuapp.com

Users are able to sign up and log in to add, delete, and complete set goals, which also records your daily goal streaks. The more goals completed, the higher the user's level will be.

Built with: CSS, JavaScript, React, Redux, Google Maps, Twilio, Node, Express & Mongo

Plumbing Company | plumbing-company.herokuapp.com

Users can send information via contact form to the administrator's E-mail, or phone - via text message, which is also stored in Mongo database.

Built with: CSS, JavaScript, React, Redux, Google Maps, Twilio, Node, Express & Mongo

Bounty Tracker | bounty-tracker.herokuapp.com

Full-stack CRUD application for retrieving, posting, editing & deleting bounties

Built with: CSS, JavaScript, React, Redux, Node, Express & Mongo

Map My Gene | mapmygene.surge.sh

Prototype in an attempt to build a better version of mapmygene.com which was originally built with WordPress

Built with: HTML, CSS & JavaScript
